RE: Former World Kitchen, Inc Discharge Pipe Plan Review

Mr. Blanchette:

The City of Massillon Engineering Department has reviewed the submitted site plan for the above referenced project. The following comments have been compiled and need to be revised and re-submitted for final review. **In your re-submittal provide a response letter addressing each comment and three (3) revised sets plans and if applicable two (2) copies of supporting documentation.**

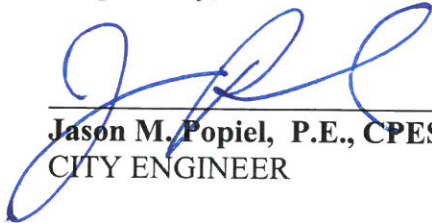

GENERAL

- 1) The existing outfall is currently permitted by the OEPA per NPDES permit #3IC00009*HD. The proposed outfall will need to be covered under the permit as well. Please coordinate the new outfall permit and provide OEPA approval.
- 2) The NPDES permit requires outfall signage. Please include this requirement on the plan set.
- 3) The NPDES permit requires monitoring of the flow. If there is no flow meter and no pump, how will the flow volume be determined?
- 4) Please change the City Engineer to Jason Popiel, PE on the title sheet.
- 5) In the profile view on sheet C-103, please provide the invert elevation of the proposed pipe at the air stripper sump, and again at the headwall. Also please provide the elevation at the edge of the stream where the riprap begins.
- 6) In the profile view on sheet C-103, please review the proposed pipe slopes, each segment states 0.15% however it does not calculate to that slope.

- 7) In the Project Description note on sheet C-202, please explain the purpose of the project. Specifically, why is this project necessary.

If you have any questions or require additional information, please contact our office at 330-830-1722.

Respectfully,

Jason M. Popiel, P.E., CPESC
CITY ENGINEER
